

Equipment Buyer's Guide

Here are 7 things to consider when selecting equipment:

1

CONSIDER YOUR NEEDS.

One size does not necessarily fit all. People come in all shapes and sizes and so does our equipment. When prescribing equipment we need to consider your individual needs:

- What you want to do - your objectives: eg recover from surgery, get out and about, go to the toilet etc.
- Your body weight
- Your height
- Your general strength

2

TRY BEFORE YOU BUY.

- Don't just buy a cheapie over the internet. It can cost you more in the long run.
- Check the rattle factor - if it rattles too much, it is not going to hum for you.
- Come in and try the equipment you are interested in. Trying it out is the only way to know for sure.

3

SHOP AT HOME.

- Ask about our Shop at Home service where you can try out equipment in the comfort of your own home.

4

GET IT RIGHT THE FIRST TIME.

- Our helpful staff will help determine the right equipment for you.

5

QUESTIONS TO ASK

- Can you get spare parts?
- If it breaks can it be fixed?
- Do you offer after sales service?
- Is there a product warranty?
- Have you been in business long?

6

INVEST IN YOUR WELL-BEING.

- Consider your hire or purchase as an investment in your well being
- Good quality, long lasting equipment is an investment in your future.
- Like most things in life, with mobility equipment you get what you pay for! A cheap model may seem like a good place to start but if it's uncomfortable, unstable, clunky or breaks down it's not much of an investment.

GET IN TOUCH WITH US.

- We only stock quality brands and the best of breed products.
- We pride ourselves on after sales service and advice, not just pushing stock out the door.
- Come and see us, or give us a call. Have a go on our demo models and get honest, professional advice.

"Thanks for the rescue. Without your fabulous service I would have been lost." A.L. from Richmond

Make the right equipment choice.
